

Shivani Chaudhary

System Engineer | Cloud Engineer & Storage Specialist

Bangalore, India | Email: shivanichaudhary.cv@gmail.com | Phone: 9473860668

LinkedIn: <https://www.linkedin.com/in/shiviichaudhary>

Professional Summary

System Engineer with 3+ years of experience in Storage Administrator and SAN environments, transitioning into cloud and DevOps engineering. Hands-on experience with Terraform, CI/CD pipelines, and cloud platforms (Azure & GCP). Skilled in provisioning scalable infrastructure using Compute Engine and Cloud Storage, with a strong focus on automation, performance optimization, and reliability. Proven ability to troubleshoot critical systems and improve operational efficiency.

Technical Skills

- **Storage & SAN:** Hitachi Storage (VSP 5600, Gxx00, Fx00, E590), IBM Storage (V7000, FS5035), HPE Storage, Brocade Switches, SAN/Fabric Management
- **Storage Tools:** HiCommand Suite 8.x, OpsCentre (Admin, Analyzer, Analyzer Detailed View, Protector), SVP, SANNav, Device Manager
- **Cloud Platforms:** Microsoft Azure, Google Cloud Platform
- **DevOps & Infrastructure as Code:** Terraform, CI/CD Pipelines, Git, Jenkins
- **Artificial Intelligence & Automation:** Generative AI, Agentic AI, AI Tools Integration, Prompt Engineering, AI-based Workflow Automation
- **Programming:** Python, Core Java, C++, HTML, CSS, JavaScript, OOPS
- **Operating Systems:** Linux, Windows
- **Databases:** MySQL, SQL Server
- **Tools:** Remedy ITSM, ServiceNow, PuTTY, SSL Certificates, LDAP

Education

Bachelor of Computer Application (BCA)

Chhatrapati Shahu Ji Maharaj University, Uttar Pradesh | 2019 – 2022 | 73.44% (First Class with Distinction)

Professional Experience

CGI, Bangalore | Storage Administrator

Client: Bell Canada | Feb 2023 – Present

- Managed storage provisioning, decommissioning, cleanup, and capacity reclaim activities to optimize storage utilization.
- Configured and improved FC zoning, resolving SAN/fabric issues to ensure high availability and performance.
- Performed daily system monitoring and handled incident, problem, and change management processes.
- Executed FOS upgrades via CLI and managed SSL certificate renewals to maintain system security and compliance.
- Managed and administered IBM, Hitachi storages, and Brocade switches.
- Troubleshoot high-severity storage issues and coordinated vendor activities including upgrades and hardware replacements.
- Executed array decommissioning and power-down activities for end-of-life storage systems.
- Assisted in cloud infrastructure provisioning using Google Cloud Platform including Compute Engine and Cloud Storage.
- Improved availability by resolving SAN issues and supporting project planning.

Projects

Generative AI Chatbot

- Built a chatbot using Generative AI to automate user query handling.
- Applied prompt engineering techniques to enhance response accuracy.
- Designed scalable deployment using cloud-based architecture.

Certifications

- Microsoft Certified: Azure AI Fundamentals
- Linux Administration Certification: Micro Academy
